

# VITAL INJECTOR3™

The Next generation Vital injector3 will assist the skin to blossom into its full form

## VITAL INJECTOR3™

### SPECIFICATIONS

Needle Information	31 G, 9Pin Multi Needle Type
Needle Penetration Control	0-5 mm(Interval 0.2mm)
Syringe Type	1cc, 2cc, 3cc, 5cc
Input Power	AC 110-240V, 50/60Hz
Dimension (WxDxH mm)	Body : 388.8 X 231 X 133.4 Injector : 294.4 X 215 X 97.5
Weight	4.84Kg (Body + Injector)

# VITAL INJECTOR3™

Vital Injector3 is multi-use injector with a capacity of loading interchangeable 1cc~5cc syringes that is versatile to various medical use. Improved the structure of injectors and needles compared to the previous device, allowing hygienic treatment.

Detachable  
Single-use filter

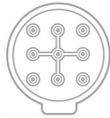

Accurately adjust  
Depth control

Reduced  
Drug-loss during  
Operation

Vacuum Pressure

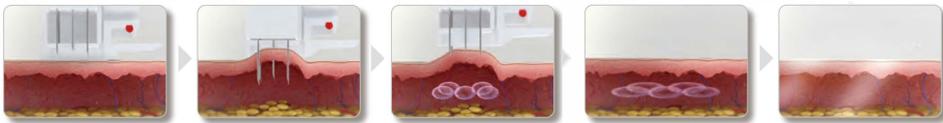

## Disposable Multi Needle 9 Pins in Round Tip

The circular designed Tip with 9 micro needles is reduced the pain sensation and treatment time. These Tips can only be used once, each pack is sterilized individually and allows hygienic and safe treatment.

## Needle + Vacuum penetration process

### Needle penetration depth

- 1 Controllable in range up to 5mm by 0,2mm interval.
- 2 Appropriate injection technique is dependent on the patient's skin and subcutaneous fat thickness
- 3 Drug is delivered at the target/suitable depth accurately.
- 4 Reduce treatment time by adapting the 31G, 9 Pin multi needle.

### Minimum drug loss & Maximum safety

- 1 The vacuum pressure lifts up skin fold,
- 2 A raised skin folds allows evenly insertion all of the 9 needles and medication is not irritate or damage the beneath tissue.

# An advanced anti-contamination system

## 1 Doble Filter System

An advanced anti-contamination system effectively protect patients and the device from contaminant. The closest filter with the injection site is designed as single-use that enhance hygienic of treatment. The secondary air filter has the Structure to easy disassemble.

## 2 Safety pin applied

Designed to protect the user from accidental needlestick injuries.

User friendly

Vital injector3 has a display screen that displays the injection information. User can set the Depth (needle insertion depth), Dose, Velocity and Vacuum level by simple operation of the UI.

- Syringe type setting (1, 2, 3, 5cc)
- Vacuum level setting (1~5 Level)
- Velocity setting (1~5 Level)
- Needle penetration Depth setting (0.0mm~5.0mm/0.2mm interval)
- Dose (Amount of injection) setting
- SHOT C/D (continuous/Dose mode)
- MODE setting SK (=skin) HR (=Hair, scalp)
- Convenient audible alarm signal (Contents of syringe are almost consumed)
